GitHub: @vin_chimaobi042

CORE SKILLS

- AI Response Evaluation
- Prompt Evaluation
- Prompt Engineering
- Data Annotation
- LLM Evaluation
- Generative AI
- Factuality Verification
- Hallucination Detection
- Instruction-Following Review
- Rubric-Based Evaluation
- Research
- Analytical Thinking
- Technical Documentation
- AI Video Content Creation
- Python Programming
- Penetration Testing
- Bug Bounty Hunting

EDUCATION

University of Port Harcourt

Rivers State, Nigeria

B.Sc. Physics Electronics

Graduated: 2021

CERTIFICATIONS

- Udemy Prompt Engineering Certification

PROFESSIONAL SUMMARY

AI Evaluation and Data Annotation Specialist with experience in AI response evaluation, prompt evaluation, data labeling, generative AI workflows, research, content quality review, and cybersecurity-informed analysis. Experienced in assessing AI-generated outputs for accuracy, relevance, clarity, factual consistency, instruction following, hallucination risk, and overall quality using structured project guidelines. Strong background in prompt engineering, rubric-based evaluation, factuality verification, analytical reasoning, research, and technical documentation.

PROFESSIONAL EXPERIENCE

AI Data Annotation Specialist

October 2020 - January 2022

Remotasks | Remote

- Contributed to AI data annotation and evaluation workflows involving data labeling, review, and quality control.
- Labeled and reviewed data according to project-specific instructions, accuracy standards, and annotation guidelines.
- Evaluated task outputs for correctness, consistency, relevance, and compliance with required criteria.
- Supported machine learning training workflows by preparing and validating human-reviewed data.
- Worked across remote task environments requiring independent judgment, fast learning, accuracy, and adherence to changing project instructions.

Personally Developed Evaluation Methods Used to Improve Speed and Consistency

- **Rubric as Recipe for Judgment:** Treated each task guideline like a judgment recipe, breaking instructions into clear requirements before rating or labeling outputs.
- **Rubric Concepts and Criterion Anatomy:** Analyzed each criterion by identifying what needed to be checked, what counted as full or partial fulfillment, and what evidence was required.
- **Five-Step Rubric Mindset:** Used a structured approach: understand the ideal output, form an initial judgment, map the criteria, compare evidence, and finalize the rating based on guideline alignment.

AI Evaluation Specialist

March 2022 - December 2023

TELUS Digital | Remote

- Evaluated AI-generated responses using project guidelines, structured criteria, and quality standards.
- Assessed outputs for accuracy, relevance, clarity, factual consistency, instruction following, and overall usefulness.
- Reviewed AI responses to identify unsupported claims, incomplete answers, hallucination risks, weak reasoning, and guideline violations.
- Applied careful, evidence-based judgment to support AI model quality improvement and response reliability.
- Provided structured feedback on AI outputs while maintaining attention to detail, objectivity, and guideline alignment.

Freelance Virtual Assistant & Blog Content Writer

2020 - Present

Upwork | Remote

- Support clients with research, blog content writing, editing, administrative tasks, and AI-assisted workflows.
- Conduct online research, organize findings, and prepare clear written materials for client use.
- Complete freelance projects involving writing, research, editing, workflow support, and content refinement.
- Use AI-assisted tools to improve productivity, develop drafts, refine ideas, and support content workflows where appropriate.
- Review content for factual alignment, user intent, consistency, and overall quality before delivery.

LANGUAGES

- ▶ English
- ▶ Igbo

TARGET ROLES

- ▶ AI Trainer
- ▶ AI Response Evaluator
- ▶ Prompt Evaluator
- ▶ Prompt Engineer
- ▶ Data Annotation Specialist
- ▶ LLM Evaluation Specialist
- ▶ AI Generalist

EVALUATION FOCUS

- ▶ Instruction following
- ▶ Factuality verification
- ▶ Hallucination detection
- ▶ Rubric-based scoring
- ▶ Response comparison
- ▶ Evidence-based review
- ▶ Quality assurance

TECH & AI TOOLS

- ▶ ChatGPT
- ▶ Claude
- ▶ Gemini
- ▶ Midjourney
- ▶ Veo 3.1
- ▶ Python
- ▶ Raspberry Pi
- ▶ HackerOne
- ▶ Bugcrowd

PROFESSIONAL STRENGTHS

- ▶ Evidence-based judgment
- ▶ Fast guideline adaptation
- ▶ Clear written feedback
- ▶ Careful error detection
- ▶ Remote task discipline

OBASIOCHIE VINCENT CHIMAOBI

AI Evaluation | Data Annotation | Prompt Evaluation

PROFESSIONAL EXPERIENCE CONTINUED

Generative AI Content Creator & AI Video Workflow Specialist

October 2024 - Present

Independent AI Content Projects | Remote

- Built and managed AI-driven YouTube channels focused on AI-assisted storytelling, video production, and content creation.
- Grew one YouTube channel to over 29,000 subscribers and more than 2 million views.
- Grew another channel to more than 1.5 million views.
- Produced AI-generated Nollywood-style films using prompt engineering, generative AI tools, and structured creative workflows.
- Created AI-powered documentary and reenactment-style content using AI voice, image, and video generation tools.
- Used ChatGPT, Claude, Gemini, Nano Banana, Veo 3.1, Midjourney, and related platforms for research, prompt development, image generation, content generation, workflow automation, and AI-assisted video production.
- Reviewed AI-generated content for coherence, realism, visual consistency, factual alignment, narrative quality, and audience suitability.

Penetration Tester & Bug Bounty Hunter

2025 - Present

Independent Client Engagements / HackerOne / Bugcrowd | Remote

- Conduct penetration testing and security assessments for clients, identifying, validating, and documenting security vulnerabilities.
- Participate in responsible vulnerability disclosure programs on HackerOne and Bugcrowd.
- Prepare technical findings with evidence, impact explanation, reproduction steps, and remediation-focused documentation.
- Perform most client engagements under Non-Disclosure Agreements, with publicly disclosable work including Syfe.com and the University of Port Harcourt web domain.
- Apply structured testing, anomaly detection, evidence validation, and risk assessment to web applications and digital platforms.
- Bring cybersecurity-informed review skills into AI evaluation work, including careful verification, error detection, factual validation, and disciplined documentation.

PROJECTS

Underwater Laser Detection Security System

- Developed an underwater laser detection security system using Raspberry Pi and Python as a final-year university project.
- Applied electronics, programming, sensor-based detection logic, and technical problem-solving to build a security-focused system.

AI-Powered Community Census Application

- Developed an AI-powered community census application as a National Youth Service Corps Community Development Service pass-out project while serving in Abinse, Guma Local Government Area, Benue State.
- Designed the project to support community-level data collection and structured information management.

AI-Generated Video and Storytelling Projects

- Built and managed AI-driven YouTube channels focused on AI-assisted storytelling, video production, and content creation.
- Grew one YouTube channel to over 29,000 subscribers and more than 2 million views.
- Grew another channel to more than 1.5 million views.
- Produced AI-generated Nollywood-style films using prompt engineering, generative AI tools, and structured creative workflows.
- Reviewed AI-generated outputs for coherence, realism, visual consistency, narrative flow, and audience suitability.
